

# Draft Paper Template

Floris Calkoen

## **Abstract**

1. Write one or two intro lines leading to the question.
2. Write one or two method lines.
3. Write two or three result and discussion lines.
4. Write a conclusion line.

# 1 Introduction

1. Get read in! Avoid inward/outward writing.
2. Trigger an already present bigger desire and let the reader feel the problem.
3. Take us along by creating a need for the next step.
4. Zoom in
5. Further in until you make the reader feel the **desire**
6. **desire**. In this case you have a solution for.
7. See if you can make the desire bigger so the reader will feel the agony of the **obstacle**.
8. **obstacle** that stands in the way of the results or solution.
9. **What you can do**. Here you share what you can do about the problem (Specific technique, know how, device)
10. **Research question**
11. So in this paper you are going to ..
12. So in this paper you will addresss this.. Note: RQ is not RQ without question mark. Questions generate tension.
13. **Steps you need to answer it**.
14. In order to achieve that you need to talk about method, results etc. Write them as a need rather than a shopping list.

## 2 methodology

1. Make a drawing of your setup or a schematic representation of your method.
2. Explain it to somebody before you write your method, to make sure you get into the right style.
3. Make sure structure is the dominant feature here.

### **3 Results and Discussion**

1. Organize your results so they provide a solution to the problem in the shortest way possible.
2. Discuss to what extend you answer the question,
3. And to which extend you do not answer the question.
4. Add results to make your answer more complete.
5. Accept that there will always be loose ends.

## 4 Conclusion

1. Conclude to which extent you answered the question.
2. Share what further steps are sensible.
